## PROFILE

Driven Computer Science graduate with a foundation in web development and a knack for leadership. Skilled in HTML, CSS, JavaScript, and Java with a focus on creating interactive and user-friendly websites. Leveraged this expertise to successfully execute multiple projects, applying problem-solving skills and creative solutions to ensure excellence in design and functionality.

## WORK EXPERIENCE

### Web Developer Intern

2023

BasketHunt. Pvt. Ltd

- During my recent internship, I demonstrated leadership and administrative skills by managing the accounts of 4-5 interns. My responsibilities included creating official email accounts and setting up work-specific Chrome tabs for these interns, thus ensuring that their digital workspaces were ready for productive use.
- My role transcended technical aspects as I was also a team lead. In this capacity, I coordinated and guided the interns, ensuring their smooth assimilation into the organization. I liaised between them and the management, helped clarify their roles and responsibilities, and offered guidance whenever necessary.
- These experiences allowed me to develop a holistic view of organizational operations, a sharp eye for detail, and a proactive attitude. My leadership role also provided me the opportunity to sharpen my interpersonal and management skills. These capabilities were put to test and honed, as I worked to balance my technical responsibilities with the equally crucial task of providing direction to my team of interns.
- Overall, my internship enabled me to grow both as an individual and as a professional, preparing me to contribute effectively in team-driven environments and fostering my readiness for future leadership roles.

### Campus Ambassador

2022

Krayonnz Pvt. Ltd

- In my internship, I worked on a unique initiative aimed at enhancing education by developing problem sets relevant to school and college curriculums. I applied my knowledge to craft engaging and challenging questions, aimed at bolstering independent learning and educational performance.
- My role also extended to user acquisition and retention, vital aspects for the growth of the platform. I employed strategic outreach and engagement tactics to attract new users, and maintain the active participation of existing ones. The ultimate objective was to cultivate an active community centered around learning.
- In sum, this internship allowed me to contribute significantly to a comprehensive educational resource, focusing on both content development and community building. Through my efforts, I helped foster an environment that encourages academic excellence and creates a stimulating, rewarding user experience.
